## Naming Polygons

Identify each polygon by its sides. Then determine whether it appears to be regular or not regular. If not regular, explain why.
1.

2.

3.

## Name each part of hexagon ABCDEF.

4. two consecutive vertices
5. two diagonals
6. all nonconsecutive sides of $\overline{A B}$

7. any three consecutive sides
8. any four consecutive vertices

Classify each polygon as convex or concave.
