

Need a password change?

Scan this QR code with your phone's camera or a QR reader app. Fill in the form, and we'll change your password as soon as we can.* When you next log in, try your ID# for both your username and your password. You will get a message saying "User must change password." Click "Okay" and create a new password by typing it twice on the next screen. If it doesn't seem to work, you need a longer or more complex password. See the librarians if you need help. 😊

*If you need the password changes right away, don't hesitate to give us a call in the library at 321-3116.
